

Wimborne District Society of Model Engineers

TO ALL JUNIOR MEMBERS

As a Junior member of Wimborne District Society of Model Engineers you will be part of a growing club based in Dorset. We welcome all junior members as you are vital to the clubs future & development. During the year we hold Junior Running Days when younger members can drive, signal and run the railway giving them the opportunity to learn the ins and outs of the club's operations.

Unfortunately junior members are not allowed to drive trains on any of the club's public running days due to our insurance policy unless it is before 10am and after 4pm when no public are on site. During public running days juniors must stay clear of running lines but can assist in setting up or clearing away and join in the operational work collecting coal, coupling coaches for drivers and ensuring tail boards are fitted. General duties such as sweeping, clearing up, some maintenance under instruction and observing the start up of locos in the turntable are permitted on running days.

Also we have a monthly Thursday evening events where different topics are covered ranging from bbq's, competition night and have a go evenings as well as film shows quiz night and skittles which all members and their families are welcome to attend.
